

Who are using Python?

The python programming language is widely used by companies around the world to build web apps, analyze data, automate operations via DevOps and create reliable, scalable enterprise applications.

1. Instagram
2. Google
3. Spotify
4. Netflix
5. Uber
6. Dropbox
7. Pinterest
8. Instacart
9. Reddit
10. Lyft
11. Industrial Light and Magic
12. Quora
13. Stripe

But they're not the only ones. As of 2018 Python adoption has reached a new peak and continues to climb.

Where we can use Python?

The Python programming language is **used** globally to design and build 2D imaging software like Inkscape, GIMP, Paint Shop Pro, and Scribus.

Also, **Python** is **used** in several 3D animation packages such as Blender, Houdini, 3ds Max, Maya, Cinema 4D, and Lightwave, to name a few. It's often **used** as a “scripting language” for web applications. This means that it can automate specific series of tasks, making it more efficient.
